

Plastic Pallets

Description:

- Essential for the electronics industry, the ESD pallets are made of conductive plastic;
- Prevention of electrostatic discharges during transportation of sensitive electronic parts, systems and components;
- Designed with 3 skids;
- 7 mm outer retaining edge to prevent loaded products from slipping off the pallet and improve stackability.

Order code ESD-TL-ODP1208

Dimensions: 1200 x 800 x 148 (h) mm

General Information:

Material: PP-ESD

Type: Open Deck

Static load: 3500 kg

Dynamic load: 750 kg

Racking load: 450 kg

Weight: 13.1 kg (±%5)

Feet\Skids: 3 skids, with 7 mm rims

Colour: Black

incl. ESD-Logo on both long sides

Temperature resistance: -40°C to +80°C

Surface resistivity: $10^4 < 10^{10}$ Ohm

Units\pallet: 16

Truck Loading Quantity: 528 pcs
